

Test Manager (Digital Solutions)

Vaše náplň práce

Continental's Data & Customer Solutions Competence Center develops innovative digital products that support both our customers and internal teams, and we'd love for you to be part of it!

Our Digital Solutions IT team is searching for a talented Test Manager to lead and elevate the testing landscape across our ContiConnect product.

As a Test Manager, you will shape and drive our overall test strategy, ensuring smooth, high-quality releases throughout the entire software development lifecycle. You'll coordinate cross-functional testing efforts, oversee test planning and execution, and guide teams in adopting best practices that raise the bar for quality across the organization.

Main Responsibilities:

- Improve and maintain the overall Test Strategy to be applied based on the best practices and initiative specifics, especially the related Release Plan;
- Document, implement, monitor and enforce all processes for testing as per the defined standards;
- Mobilize and manage identified stakeholders for all the execution of integrated testing activities;
- Management of the software development lifecycle working closely with design, product managers, and development teams;
- Ensure product meets clients specifications within defined deadlines and quality standards;
- Coordinate and perform manual and/or automated tests to validate product functionality, performance, and quality;
- Oversee the creation and execution of test plans, test cases, and test scripts;
- Oversee the defect management process, ensuring proper identification, documentation, prioritization, and follow-up with development teams;
- Manage the end-to-end testing effort, ensuring deliverables are completed on time and within scope;
- Supervise test environments, test data preparation, testing tools, and the implementation of test automation;
- Collaborate closely with architecture, development teams, product managers and central key users to plan testing phases and align expectations;
- Act as the primary escalation point for all matters related to testing activities;
- Lead and mentor development teams to quality best practices;
- Provide regular reports on QA activities, metrics, and project status to senior management.
