

Full Stack Developer (Digital Solutions)

Your tasks

We are looking for a highly skilled Full Stack Developer with expertise in Angular and Java (Spring Boot) to work within Continental's Data & Customer Solutions Information Technology Competence Center.

If you'd love to join an international crowd that works on the latest technologies and creates state-of-the-art solutions, Continental is the perfect match for you.

As a FullStack developer, you will work in a SCRUM team closely with the backend and frontend developers, solutions architects and UI/App developers to build and enhance our existing and future digital services within Continental Tires. With this job, you join the global team working on our product ContiConnect, a digital tire monitoring platform for commercial fleets around the world.

Main Responsibilities:

- Shaping the frontend and backend architecture of the ContiConnect web application;
- Implementing features through active collaboration with business partners;
- Providing support of the productive system by solving bugs;
- Driving development standards, code reuse, and agile principles within the agile development team;
- Enhancing the technical documentation and our test scenarios.

Your profile

- University Degree in Computer Science, IT or related field;
- 3 years of professional experience in full-stack development with Angular (15+) and Java (11+) with Spring Boot;
- Strong knowledge of TypeScript, JavaScript, HTML5, and CSS3;
- Proficiency in RESTful APIs and WebSockets;
- Experience with databases (PostgreSQL);
- Familiarity with container technologies (Docker, Kubernetes) is a plus;
- Proficiency in Git, CI/CD tools and agile methodologies (Scrum);
- Knowledge of security best practices for frontend and backend development;
- Excellent written and verbal communication skills in English;
- Excellent organizational skills;
- Able to work independently as part of a global team.
