

Product Development Engineer - Power Transmission Solutions

Ihre Aufgaben

HOW HOW YOU WILL MAKE AN IMPACT

We are seeking a skilled Product Development Engineer for Power Transmission Solutions to join our innovative team in the Americas region, based in our Chihuahua, Mexico facility. In this role, you will be responsible for supporting our Industrial Solutions Americas business by developing and optimizing power transmission belts and systems.

- Drive New Product Development projects from G30 to G60
- Define DFMEA and product DVP to meet the project requirements, and develop test plans and procedures
- Technical lead in development projects, internal or with customers
- Work with Material Platform / Material Process Engineering to define specifications and test procedures for raw material suppliers (cord, fabric, coating, rubber)
- Assist in the development and approval of new alternative material suppliers and support audits if necessary
- Systematically analyze own and competitor products, including their product performance and manufacturing process

Ihr Profil

What you will bring to the role

- University Bachelor's degree in Mechanical or Chemical Engineering
- Strong problem-solving skills with a detail-oriented approach.
- Strong analytical abilities and data interpretation skills.
- Experience with product development lifecycle and manufacturing processes.
- Effective communication and teamwork skills.
- Ability to manage multiple projects and priorities in a fast-paced environment.
- English language proficiency

Additional ways to stand out

Advanced level of:

- Fundamental knowledge in elastomers, reinforcements, and according manufacturing processes (tech.)
- Experience in rubber engineered products industry, preferably in a product development, application engineering, or manufacturing engineering role
- Overall knowledge of belt manufacturing processes
