Global IT Team Lead Integrity & Law BA OESL - REF85706U

Vos activités

Are you an ambitious IT professional looking for challenges, growth, and flexibility? You are structured and enjoy communicating and exchanging with stakeholders while driving things forward? Then you've come to the right place.

The OESL IT department is newly conceived and being built now! With this pioneering effort, OESL IT will be flexible, fast, and forward-thinking. Our IT team will become a strategic advisory partner, strengthening digital capabilities and driving business success.

In your role as **Global IT Team Lead Integrity & Law Applications**, you will work in a dynamic environment and shape the Integrity & Law IT landscape with us. The role handles the relationship towards our business customers as well as to our internal and external suppliers for all Integrity & Law applications. You will be an integral part of the OESL IT's new business applications team, having responsibility for approximately 4+ FTE`s.

Your Responsibilities:

- Define and manage the IT product portfolio strategy for Integrity & Law applications, ensuring seamless integration with corporate objectives and alignment with legal requirements, controlling, and financial reporting needs
- Develop and maintain application roadmaps that drive innovation, agility, and operational efficiency across law, compliance, sustainability and audit
- Take full responsibility for the IT product lifecycle, including planning, demand management, delivery, and outcome reporting, ensuring continuous improvement and proactive issue resolution.
- Foster a product-oriented culture with a BizDevOps approach, managing both domestic and international teams for seamless collaboration across time zones and business units
- Build and lead product teams, promoting accountability, innovation, and high performance while empowering them to work independently using agile methods
- Ensure effective resource allocation across Integrity & Law IT initiatives, maintain alignment with business priorities, and provide mentorship to foster team development and career growth
- Act as the central liaison between IT, Integrity & Law, and key business stakeholders, ensuring IT solutions effectively support Integrity & Law strategies, cost control, risk management, and regulatory compliance
- Maintain relationships with partners and suppliers in the Integrity & Law Application space, ensuring best-in-class solutions and support
- Drive IT innovation by leveraging emerging technologies (AI, process automation, advanced analytics, etc.) to modernize Integrity & Law operations

- Promote continuous improvement, optimizing IT-enabled legal processes to enhance efficiency, compliance, and cost-effectiveness

Applications from severely handicapped people are welcome.

Votre profil

- Degree in IT, business informatics / engineering / administration or equivalent
- Proven experience in managing a comprehensive portfolio of Integrity & Law applications, ensuring their seamless integration into a modern IT architecture
- Experience driving digital transformation initiatives in Integrity & Law processes, leveraging modern IT solutions to enhance transparency, compliance, and operational efficiency
- Excellent communication and stakeholder management skills, with the ability to collaborate effectively between IT, Integrity & Law and external partners
- Strong knowledge of modern IT architectures, including cloud-based platforms, automations tools, and analytics-driven solutions
- Business acumen and the capability to analyze complex integrity & law requirements into effective IT solutions
- Demonstrated experience in leading IT projects across multiple stakeholders and cross-functional teams, both locally and internationally
- Advanced skills in multi-project management, with the ability to manage priorities, align resources, and drive timely delivery of Integrity & Law IT initiatives
- Strong leadership and coaching skills, with the ability to inspire, develop, and motivate high-performing, cross-functional teams
- Ability to articulate complex technical concepts and translate them into understandable language for executives and non-technical stakeholders
