

# DevOps Environment Specialist (m/f/w) - OESL - REF860790

## Vaše náplň práce

- **Manage GitHub repositories and workflows:** Oversee version control, branching strategies, and repository organization. Implement and maintain GitHub Action runners on Kubernetes to automate CI/CD pipelines.
- **Administrate Jira and Confluence:** Configure, customize, and integrate Jira and Confluence to support project management and documentation needs.
- **Oversee cloud environments:** Manage and optimize AWS and Azure development environments to ensure reliability, scalability, and performance.
- **Maintain artifact repositories:** Administer artifact repositories such as AWS CodeArtifact, ensuring efficient storage and retrieval of build artifacts.
- **Collaborate with development teams:** Work closely with developers to streamline workflows, improve deployment processes, and enhance overall productivity.
- **Automate processes:** Identify opportunities for automation and implement solutions to reduce manual tasks and improve efficiency.
- **Ensure security and compliance:** Implement best practices for security and compliance across all DevOps tools and processes.
- **Troubleshoot and resolve issues:** Provide timely support and resolution for any issues related to the DevOps environment.

## Váš profil

- Bachelor's degree in Computer Science, Engineering, or related field.
- Proven experience as a DevOps Engineer or similar role.
- Strong knowledge of GitHub, including GitHub Actions and Kubernetes.
- Experience with Jira and Confluence administration.
- Proficiency in cloud platforms (AWS and Azure).
- Experience with artifact repositories (e.g., AWS CodeArtifact).
- Proficiency in scripting languages (e.g., Python, Bash).
- Familiarity with CI/CD tools and practices.
- Excellent problem-solving skills and attention to detail.
- Strong communication and collaboration skills.

Applications from severely handicapped people are welcome.
