

DevOps Environment Specialist (m/f/w) - OESL - REF860790

Vos activités

- **Manage GitHub repositories and workflows:** Oversee version control, branching strategies, and repository organization. Implement and maintain GitHub Action runners on Kubernetes to automate CI/CD pipelines.
- **Administrate Jira and Confluence:** Configure, customize, and integrate Jira and Confluence to support project management and documentation needs.
- **Oversee cloud environments:** Manage and optimize AWS and Azure development environments to ensure reliability, scalability, and performance.
- **Maintain artifact repositories:** Administer artifact repositories such as AWS CodeArtifact, ensuring efficient storage and retrieval of build artifacts.
- **Collaborate with development teams:** Work closely with developers to streamline workflows, improve deployment processes, and enhance overall productivity.
- **Automate processes:** Identify opportunities for automation and implement solutions to reduce manual tasks and improve efficiency.
- **Ensure security and compliance:** Implement best practices for security and compliance across all DevOps tools and processes.
- **Troubleshoot and resolve issues:** Provide timely support and resolution for any issues related to the DevOps environment.
