

IT Data Architect (m/f/d) BA OESL - REF86090C

Tus actividades

Data Architecture

- Design, implement and manage OESL's data architecture to ensure secure, scalable and high-performance data processing for data analytics use-cases.
- Shape OESL's data architecture strategy, striking the perfect balance between cost, flexibility, performance, and innovation.
- Lead the evaluation, selection, and seamless integration of cutting-edge data warehousing technologies, tools, and services.

Implementation and Optimization

- Deploy and manage data integrations across systems based on industry best practices to ensure performance and availability targets are met.
- Continuously enhance data processing chains by optimizing performance, reducing costs, and strengthening security measures.

Governance and Compliance

- Ensure data architectures adhere to regulatory requirements and security standards such as ISO and GDPR.
- Develop and enforce governance frameworks for relevant resources, emphasizing data privacy, access control, and compliance.

Collaboration and Stakeholder Engagement

- Partner with cross-functional technical leaders to align data strategies with business objectives.
- Collaborate with DevOps, Security, and Infrastructure teams to drive seamless adoption and integration of cloud services across OESL.
- Maintain strong relationships with external service providers, staying ahead of emerging trends and technologies.

Hiring can take place at different OESL IT Locations

Tu perfil

We're seeking a skilled **Data Architect** to lead the implementation of OESL's data strategy. Key skills and expertise include:

- **Data Driven Applications:** Experience with design, setup and operation of data integration workflows and ETL processes across multiple systems (e.g. ERP, CRM, IoT Data Sources)
- **Data Platforms:** Experience with usage and optimization of business warehouses. Preferably, based on SAP BW or Databricks.
- **Cloud Platforms:** Experience with AWS or Azure and designing scalable, secure data driven applications using cloud technology.
- **Data Governance & Security:** Familiarity with central regulations (e.g.
