

SAM_149 SE Technical Project Leader

Vaše náplň práce

Technical communication with all project groups and teams in ESS, plant, customer and supplier
Project tracking and report of technical project status
Estimation of technical risks

Knowledge of standard processes (V-modell)
Knowledge of AUTOMOTIVE SPICE
Knowledge of system components process life cycle (PLC)
Review & release of development results/parts
Assistance for optimization of development processes used in CC Systems&Functions

Collection of external (supplier) costs & estimation of internal efforts (personal resources, prototypes, licenses, ...)
Creation and update of project time schedule (technical issues)
Tracking of schedule tasks
Find agreement with customer for development timing

Assignment of responsibilities and interface agreement with customer (for technical contents)
Import of customer requirement documentation and alignment to requirement engineers
Tracking of requirement evaluation
Provide customer product documents (clarify customer demands and find solution with responsible teams)
Find, evaluate, estimate and track change management issues (effort, timing, risks)
Collection of project documentation and coordination of delivery to customer and suppliers

Planning of test timing
Tracking of test task
Manage release recommendation

Váš profil

Knowledge in chassis suspension systems, specially air suspension systems

Knowledge of the software development processes in the automotive industry (example: Spice)

Knowledge of embedded software development and model based software development with Simulink/Targetlink

Knowledge about development tools for configuration and change management (favored MKS), requirement management (favored

O nás

Continental develops pioneering technologies and services for sustainable and connected mobility of people and their goods. Founded in 1871, the technology company offers safe, efficient, intelligent and affordable solutions for vehicles, machines, traffic and transportation. In 2021, Continental generated sales of €33.8 billion and currently employs more than 190,000 people in 58 countries and markets. On October 8, 2021, the company celebrated its 150th anniversary.

The Automotive group sector comprises technologies for passive safety, brake, chassis, motion and motion control systems. Innovative solutions for assisted and automated driving, display and operating technologies, as well as audio and camera solutions for the vehicle interior, are also part of the portfolio, as is intelligent information and communication technology for the mobility services of fleet operators and commercial vehicle manufacturers. Comprehensive activities relating to connectivity technologies, vehicle electronics and high-performance computers round off the range of products and services.
