

Lab Test Engineer

Your tasks

- Manage and conduct daily test requests for internal and external orders, providing reliable test results and reports within agreed timeframes.
- Ensure best customer service by applying entrepreneurship principles and utilising global SSL Central Laboratories resources.
- Implement new standards and set up test methods as required.
- Support R&D and sales during product development with internal and external testing.
- Assist QM, production, and purchasing with claim analysis and lab testing.
- Coordinate service, maintenance, and calibration of test devices.
- Define and create test plans for the local lab, ensuring internal testing capability for designated customers/products.
- Support R&D in creating raw material and product specifications, focusing on test method applications.
- Develop new and improve existing test methods, including documentation.
- Implement and maintain CNAS and ISO/IEC 17025 laboratory management systems.
- Ensure measurement system analysis (MSA) and cross-checks for measurement equipment in global alignment.
- Fulfil other tasks as assigned by superiors.
