

IT Linux System Specialist BA OESL

Tus actividades

We are looking for an **IT Linux System Specialist for our OESL Data Center team**. You will be responsible the design, optimization and management of our Linux systems and datacenter infrastructure. The role ensures that the Linux infrastructure is fully aligned with OESL standards and operational requirements, maintaining high availability and performance in selected data center and supported locations.

Key Responsibilities:

- Ensure proper functionality and integration of Linux systems
- Plan and manage lifecycle and patch management for Linux systems using automation tools
- Build and maintain Linux server images and automation pipelines for provisioning and configuration.
- Troubleshoot and optimize Linux environments for high performance and reliability
- Lead external IT provider and drive service delivery improvements

Tu perfil

- Bachelor's degree in Computer Science, Information Technology, or related field
- 3+ years of hands-on experience managing Linux environments
- Knowledge of Linux server environments, including enterprise distributions
- Proven track record in leading cross-functional teams and driving service delivery
- Strong communication and stakeholder management skills
