

Sr. Staff Product Industrialization Engineer

Your tasks

THE POSITION

NOTICE OF FILING OF APPLICATION UNDER THE U.S. DEPARTMENT OF
LABOR'S PERMANENT LABOR CERTIFICATION PROGRAM

**Sr. Staff Product Industrialization Engineer, OESL Automotive USA LLC,
Sun Prairie, WI:**

Coordinate the product and process industrialization function for Automotive Rubber plant operations. Execute on change management for new products, materials, equipment, or new/relocated production processes, according to internal standards. Update product-specific production specifications, such as production cycle times, process characteristics and parameters, according to internal standards. Ensure the achievement of the product and process industrialization targets according to internal and external customer expectations. Translate business, project, and product-specific requirements into tangible impacts on the plant (e.g., investment, capacity, capability) and assess plant readiness. Update product-specific Process Failure Mode Effect Analysis according to local conditions and standards. Perform product-specific requests for testing and start-up of the production process and pre-series production (e.g., ensure run rate) and hand over to the production series according to standard. Update the product-specific production flow chart and production control plan in close cooperation with Quality and work instruction (pre-series, series) according to standards provided by central research and development and application engineering.

Full time employment, Monday - Friday, 40 hours per week,
\$111,930.00 - \$141,770.00 per year.
