

Teamcenter Client Customization Consultant

Your tasks

For our IT Competence Center for Research and Development we are looking for a highly dedicated Teamcenter Developer to join our strong and motivated team in Bengaluru, India.

Teamcenter is a widely used tool for product data management. It serves as the main framework within IT CC R&D for developing applications that support processes such as tire and material specification, mold specification, and digital solutions.

To meet Continental's business needs, a significant amount of customization has been implemented on top of the standard Teamcenter product. This position is essential to address the growing demand for Teamcenter customization and upgrade projects. Additionally, it ensures that the expertise gained in Teamcenter remains within the department and is effectively shared across the team.

Responsibility

Teamcenter Development

Implement solutions for Teamcenter RAC and Active workspace customization based on requirements.

Write design documents for the Teamcenter-based implementation.

Teamcenter Upgrades/Migration

Support application teams in Teamcenter upgrades.

Assist application teams in migrating Teamcenter clients from RAC to Active Workspace.

Projects

Participate as a team member in IT software projects using the Teamcenter platform.

Support project teams by sharing expertise on Teamcenter customization.

Identify and propose optimizations for existing Teamcenter customizations.

Trainings

Ensure that the knowledge gained from Teamcenter implementation is transferred to internal application teams.

Skills Required

Technical Expertise:

- **Teamcenter Client-Side Customization:** Expert-level proficiency in RAC, Active workspace, JAVA, JAVA Script, HTML
- **BMIDE configuration:** Advanced skills in configuration of data model, rules etc.
- **Teamcenter Modules:** Advanced knowledge of core modules including Organization, Workflow Designer, Access Manager, Query Builder, and PLMXML/TCXML.
- **Server-Side Customization:** Basic familiarity with customizing Teamcenter Server Side (ITK, C, C++)
