

Facilities Engineer AGS Greenfield

Your tasks

The mission of the position is to plan, coordinate and control all facility management activities in order to meet budget and facility management targets (e.g. utilities and media availability, facility costs, etc.). Furthermore, the Facility Manager initiates and implements action plans for continuous improvement of all facility management relevant processes.

- Manage and coordinate all facility management activities for the plant
- Translate plant facility management strategy into action plans and ensure implementation

- Contribute to strategic and operative planning of the plant/operations unit (e.g. with respect to investments, capacity and headcount planning)

- Ensure the achievement of facility management targets according to internal and external customer expectations

- Initiate and implement continuous improvement activities by applying CBS methods and training measures

- initiate and control investments for facility equipment (e.g. energy supply, steam generation, emission treatment, etc.)

- Interface to segment, BU or division functions in order to gather local facility management requirements and demands and other feedback

- Participate in and/or steer global or local facility management related and cross-functional projects

- Conduct employee dialogues, personnel development and coaching

Your profile

- Bachelor's degree preferably in mechanical or electrical engineering, energy supply or related technical discipline.
- Advanced English
- Experience in infrastructure (steam generation, cooling systems, compressed air, electrical substations). You don't need to be an expert in all of them, but you do need experience.
- Administration and planning of utility projects, budgets, etc.
- Management of preventive maintenance for buildings and infrastructure.
- Experience in managing indicators using a BMS (Building Management System) or a digital platform.
- Experience with legal requirements and audits of facilities under NOM001 and 14001 standards.

About us

Continental develops pioneering technologies and services for sustainable and connected mobility of people and their goods. Founded in 1871, the technology company offers safe, efficient, intelligent and affordable solutions for vehicles, machines, traffic and transportation. In 2024, Continental generated sales of €39.7 billion and currently employs around 190,000 people in 55 countries and markets.

Guided by the vision of being the customer's first choice for material-driven solutions, the ContiTech group sector focuses on development competence and material expertise for products and systems made of rubber, plastics, metal, and fabrics. These can also be equipped with electronic components in order to optimize them functionally for individual services. ContiTech's industrial growth areas are primarily in the areas of energy, agriculture, construction, and surfaces. In addition, ContiTech serves the automotive and transportation industries as well as rail transport.
