

EHS Manager

Vaše náplň práce

The mission of the position is to plan, coordinate and control all ESH activities in order to meet budget and ESH targets (e.g. optimize fire prevention and environmental protection, maximize employee safety and health as well as plant security). Furthermore, the position initiates and implements action plans for continuous improvement of all ESH relevant processes.

- coordinate all ESH activities for the plant
- align and transform group and BA ESH strategy into action plans and ensure implementation
- contribute to strategic and operative planning of the plant/operations unit (e.g. with respect to investments, capacity and headcount planning)
- ensure the achievement of ESH targets according to internal and external customer expectations
- initiate and implement continuous improvement activities by applying CBS methods and training measures
- live and promote the ESH principles and methods (e.g. advise Plant Management on all ESH aspects)
- initiate and control investments for ESH equipment (e.g. training materials, external trainings, etc.)
- interface to segment, BU or BA functions in order to gather local ESH requirements and demands and other feedback
- participate in and/or steer global or local ESH related and cross-functional projects
- coordinate safety inspection procedures for new plant installations prior to their start-up
- plan and conduct environmental and safety audits and compliance measures according to standards (i.e. CT management system, SH Corporate)
- implement external (e.g. ISO 14001, ISO 45001, ISO 50001) and internal (e.g. ESH management manual, tools, KPIs) ESH standards and legal requirements and provide feedback and input for further development of standards
- follow up on legal regulations and evaluate possible impacts on processes and facilities
- ensure that all legally required permits are applied for in due time and that permit conditions are evaluated and implemented and advise plant management
- check compliance with legal and internal regulations/standards/processes and implement measures together with local authorities
- set up and implement GEMBA walk and related with regards to safety issues
- conduct risk analyses (i.e. GRC, environmental protection) and prepare concepts and emergency preparedness plans
- ensure structured root cause analyses of incidents, define and
