

## JP Tire RE - Market Planner

### 工作职责

As a critical member of the Supply Chain team, you will collaborate with frontline operations, program, product, and technology teams to define and implement innovative solutions for our customers. This role demands a high level of proficiency in data retrieval, integration, visualization, and presentation to enhance the efficiency of the Tire delivery network and optimize the management of our extensive global logistics system.

- Collaborate with leadership to extract and analyze critical data for developing supply chain solutions
- Provide strategic support to the sales and marketing team to achieve sales targets
- Transform complex data into actionable business intelligence
- Manage large datasets, automate data extraction processes, and develop comprehensive monitoring and reporting dashboards
- Conduct in-depth analyses of outlier events in conjunction with internal stakeholders
- Identify and address root causes of business challenges while proactively seeking forward-looking opportunities
- Optimize order processes to meet Key Performance Indicators (KPIs) for forecast accuracy, inventory turnover, inventory structure, article availability, and backorder management
- Facilitate effective decision-making by aggregating data from multiple sources and presenting it in a clear, actionable format
- Establish and maintain professional relationships with sales representatives, marketing product managers, and pricing specialists
- Deliver complex analyses and insights to stakeholders and business leaders through clear verbal and written communication
- Provide mentorship and guidance to junior colleagues, particularly direct-ship coordinators
- Continuously enhance personal capabilities to meet the evolving demands of the role
- Demonstrate strong people management skills
- Commit to ongoing learning and skill development in emerging technologies and analytical techniques
- Actively participate in internal audits and implement necessary actions

### 职位要求

- Bachelor degree
  - Minimum of 7 years experience in Demand Planning in SCM or Logistics
- Advanced SAP/ IT( Excel/ Word/ Power Point, etc) skill, experience using very large datasets
- Experience defining program requirements and using data and metrics to determine improvements
