

Material Developer Plastics Plant Hann. Münden Original Equipment Solutions (m/f/diverse) - REF90226F

Tus actividades

The goal of Material Development Plastics is laying the foundation of innovation for the Business Area - Original Equipment Solutions (OESL) to be the leader for highly developed, intelligent and sustainable plastic products for the automotive industry as the best solutions for each of our customers in each of our markets. Task of the Material Developer Plastics (m/f/d) is the development of new technologies with special focus on polymer based compound materials. This goal is achieved by an effective execution and management of R&D projects.

The tasks will focus on the following activities:

- Development of new plastic materials from internal and external sources as basis for product development to ensure technology leadership of OESL in the area of plastics components
- Transforming product requirements into material requirements and specifications for internal and external suppliers
- Innovating and/or creating solutions to support our corporate sustainability strategy
- Follow market on technical development
- Acting and inspiring colleagues to challenge the status quo in order to create sustainable solutions
- Organizing and performing material releases (internal and at the customer)
- Supporting material analysis of field damage parts with focus on plastics
- Following PLC regulations to ensure defined process / IATF
- Concept evaluation, DVP&R, FMEA, Tolerance stack-up, Pareto Search and Risk Analysis
- Leading material development projects
