

Mustang: Senior Analyst Vulnerability Management

Your tasks

As an IT Analyst for Vulnerability Management, you will be responsible to actively operate and continuously improve the service. The scope is worldwide, and you will work within a team of cybersecurity professionals in the Security Operations Center.

You will identify, prioritize, assign, and track findings following the complete vulnerability lifecycle. You will act as escalation contact for external service delivery units as well as internal customers. With your help and expertise, the Vulnerability management service will evolve, empowering all stakeholders with the understanding to make informed choices and actions to resolve vulnerabilities.

Ready to shape the future? This is your chance: You will be challenged to collaborate in strategy definition, and implementation plans in the team with the goal to reach next level cybersecurity.

Responsibilities:

- Work with scanning tools to identify vulnerabilities
- Work with IT Service Management tools to address vulnerabilities and mitigations
- Support asset owners in understanding vulnerabilities and selecting appropriate remediation measures
- Regular reporting on vulnerability management topics
- Derive risk statements from vulnerabilities by contextualizing within company infrastructure
- Implement automations and continuously improve the automation process
- Stay up to date with current cybersecurity trends

Your profile

- academic degree in Computer Sciences, IT or similar qualifications
- advanced understanding of the vulnerability management process
- experience in working with vulnerability management tools
- knowledge of automation and programming would be desirable (JavaScript, Python)
- knowledge of client, server and cloud infrastructure and mutual understanding of applications architecture
- general understanding of challenges within OT
- proficient English language skills (written and spoken)
- IT service management skills (ITIL) needed
- Strong presentation skills with the ability to communicate effectively across domains of the organization and to non-technical stakeholders.
- interpersonal and intercultural skills to work with different stakeholders
- good (self-)organizational skills

About us

Continental develops pioneering technologies and services for sustainable and connected mobility of people and their goods. Founded in 1871, the technology company offers safe, efficient, intelligent and affordable solutions for vehicles, machines, traffic and transportation. In 2022, Continental generated sales of €39.4 billion and currently employs around 200,000 people in 57 countries and markets.

The ContiTech group sector develops and manufactures, for example, cross-material, environmentally friendly and intelligent products and systems for the automotive industry, railway engineering, mining, agriculture and other key industries. Guided by the vision of “smart and sustainable solutions beyond rubber,” the group sector draws on its long-standing knowledge of the industry and materials to open up new business opportunities by combining various materials with electronic components and individual services.
