Continental

Cloud Engineer – IT HUB Otrokovice

工作职责

- The Cloud Engineer is responsible for designing, implementing, managing, and optimizing cloud solutions within our company.
- The Cloud Engineer collaborates with development, security, and operations teams to ensure scalability, availability, and security of cloud services.

Key Responsibilities:

- Manage cloud platforms (e.g., Azure, AWS, GCP)
- Automate infrastructure deployment and management (IaC – Infrastructure as Code)
- Monitor performance and availability of cloud services
- Ensure compliance with security and regulatory requirements
- Support application and system migration to the cloud
- Contribute to the design of cloud architecture solutions

职位要求

- Experience with cloud platforms and tools (Terraform, Ansible, Kubernetes, etc.)
- Understanding of networking concepts, security, and DevOps principles
- Scripting skills (e.g., PowerShell, Python, Bash)
- Analytical thinking and problem-solving abilities

Preferred Qualifications:

- Certifications such as Azure/AWS/GCP Architect or Engineer
- Experience with hybrid environments and multi-cloud strategies
