

QMtC Business Application Owner & Key User

Your tasks

Your tasks

The Quality Management and technical Compliance at Tires (QMtC) is responsible for ensuring quality of all products, which are produced on the basis of customer specifications and corresponding system guidelines. This is supported by the integration of digital technologies – such as low-code applications, automation, data science, and AI systems – into quality-related processes to enhance the precision, traceability, and efficiency of quality assurance.

In order to strengthen our team, we are looking for a QMtC Business Application Owner & Key User

In this role, you will

- Manage digitalization projects within Quality Management, ensuring alignment with strategic quality goals and standards for technical Compliance
- Collect requirements from business stakeholders and translates them into IT specifications for digital quality solutions
- Manage development, maintenance and continuous improvement of IT applications and platforms to enhance quality assurance processes and data transparency
- Validate IT applications through business and user acceptance testing to ensure usability and effectiveness
- Monitor system performance and data integrity across IT applications in quality management
- Collaborate with cross-functional teams to create, maintain and improve digital quality workflows with interfaces to R&D and manufacturing
- Drive automation and connectivity initiatives to reduce manual effort and improve process reliability
- Integrate AI capabilities into IT applications to support user interaction, decision-making, and information processing
- Ensure compliance to internal and external standards through digital traceability and documentation systems
- Apply data science to identify trends, risks, and opportunities in data sets for continuous quality improvement
- Drive roll-out, deployment and change management activities related to digital transformation in quality processes

Your profile

- Degree in business management, IT, science, engineering or a comparable field of study
- Minimum of 10 years working experience
- Working experience in quality, project management and IT
- Experience in leading people in projects
