

Global IT Team Lead – SAP Cross Applications (m/f/d)

Descrição da função

We are looking for a **Global Team Lead** to oversee our **SAP Cross Applications** team, covering key technical areas such as **SAP Basis**, **Authorizations**, and **ABAP Development**.

This position combines **hands-on SAP Basis expertise** with **strategic leadership**, ensuring the stability, performance, and security of our global SAP landscape.

You will lead a global team of specialists, coordinate technical operations across regions, and play a crucial role in guiding the roadmap for our SAP environment.

Key Responsibilities

- Lead a global team responsible for SAP Basis, Authorizations, and ABAP Development.
- Serve as the **technical authority for SAP Basis**, overseeing system performance, upgrades, patching, and landscape design.
- Manage SAP system installations, upgrades, migrations, and support packages in collaboration with external partners
- Support project teams in technical planning and landscape design.
- Proactively recommend and implement improvements in stability, performance, and automation.
- Manage activities regarding user access and authorization concepts, ensuring compliance with security standards.
- Coordinate and prioritize global development activities in cooperation with the other SAP streams
- Collaborate with infrastructure, application, and security teams to ensure system reliability and scalability.
- Establish global governance, documentation, and standard operating procedures for SAP technical operations.
- Monitor system health, capacity planning, and disaster recovery readiness.
- Drive continuous improvement and innovation across the areas in responsibility.

Requisitos

- Bachelor's or Master's degree in Computer Science, Information Systems, or a related field.
- 8+ years of experience in SAP technical operations, with **deep hands-on experience in SAP Basis** (system administration, installation, performance tuning, upgrades, etc.).
- Strong understanding of SAP transport management, client copies, system refreshes, and upgrades.
- Knowledge of SAP security, authorization concepts, and system monitoring tools.
