

Supply Chain Planner

Vos activités

Integrating the Supply Chain area within the Operations and Logistics Division, this professional will be responsible for managing the availability of a portfolio of products. Their main activity will focus on the production planning process, defining the quantities to be produced for each item according to the needs of different global markets, in order to maintain balanced stock levels of our products throughout the entire supply chain. They will have the opportunity to collaborate with various local and global interfaces, from manufacturing to final markets, and will also play an important role in optimizing our digital infrastructure.
