

Master Thesis Project: Automated Machine Integration Framework - Solution Development Center

Náplň práce

Rolling out a project across multiple machines has consistently been one of the biggest post-development challenges.

A lack of shared understanding of the project, limited knowledge of the solution, isolated decision-making, and self-focused approaches are just a few factors that can turn every machine into a separate pilot, making long-term maintenance difficult.

This project aims to address these issues by collecting the minimum required data from each specific machine and automatically generating the most relevant integration codes and supporting materials.

To simplify and standardize the deployment of a project across multiple machines by minimizing manual effort and inconsistencies

Profil kandidáta

- Training Area in Information Technology, Industrial Automation or similar;
- Good knowledge of: IT, C#, ASP.NET Core, .NET Core, React, UI/UX, GIT;
- Knowledge in: PLC, OPC, UA (plus).

Čo ponúkame

Our offer:

- Integration in a challenging and international work environment;
- Collaborative working style;
- Learning opportunities for professional development.

We are committed to fostering a workplace where everyone feels safe, respected, and valued. All kind of applications are welcome.

Please note:

- Mandatory to be studying in a Portuguese University, ready to start Master Thesis Project.
- To initiate on the 2nd Semester of 2025-2026.
