

IT Consultant Smart Factory Applications OESL

Náplň práce

Are you excited by the opportunity to shape the future of manufacturing through digital technology? Join our Business Application Product Team and help transform OESL's production environments into smart, data-driven, and automated operations.

Your Impact

As our IT Consultant for Smart Factory Applications, you'll collaborate closely with manufacturing and operations teams to design, implement, and support cutting-edge digital solutions. By connecting business needs with innovative technologies, you'll play a key role in driving automation, operational excellence, and continuous innovation across our global Smart Factory landscape.

What You'll Do:

- Act as a strategic partner for operations and manufacturing teams, identifying and delivering digital solutions that drive efficiency and automation.
- Design, implement, and manage smart factory applications and platforms (e.g., MES, IoT, data automation).
- Bridge business and IT by translating operational requirements into robust, scalable IT solutions.
- Identify opportunities for Industry 4.0 enablement and support project delivery from concept to rollout.
- Ensure integration of smart factory solutions into the broader IT landscape, including cloud and infrastructure environments.
- Apply project and service management best practices to ensure quality, security, and compliance.
- Collaborate with internal and external partners to ensure timely, high-quality solution delivery.
- Support supplier evaluation, selection, and contract management in partnership with corporate IT purchasing.
- Foster a culture of innovation, technical compliance, and process reliability on the shop floor.
- Encourage continuous improvement and challenge the status quo to develop sustainable, future-ready solutions.

Profil kandidáta

To succeed in this role, you bring advanced expertise across several critical domains:

- Smart Factory & Industry 4.0 Concepts: Strong experience with MES, IoT, and automation technologies within manufacturing environments.
- IT Infrastructure & Cloud Concepts: Solid understanding of IT architecture, connectivity, and cloud integration.
