

OESL IT Data Steward OESL (m/f/d)

Vaše náplň práce

Data Driven Applications

- Contribute to the success of OESL's data driven applications by ensuring proper governance and alignment across data domains

Implementation and Optimization

- Implement and maintain IT-managed reporting use cases end-to-end (from data curation to report creation).
- Continuously support business and IT stakeholders in coordinating between data domains to maximize the benefit of data driven insights.
- Act as a trusted advisor supporting developers of data products and data domain owners throughout the complete data product's lifecycle.

Governance and Compliance

- Ensure data usage is compliant and in line with relevant policies and regulations (e.g. GDPR)
- Establish governance models that support the OESL organization to make best use of its data

Collaboration and Stakeholder Engagement

- Collaborate with business and IT stakeholders to foster strong partnerships in the domain of data warehousing and reporting.

Váš profil

We're seeking a skilled **Data Steward** to ensure governance of our Data Driven Applications / Data Products by actively shaping ways of working, fostering strong domain alignment and supporting the evolvement of our platforms.

Key skills and expertise include:

- **Communication:** Benefit from your strong communication skills and collaborative attitude when working in cross-functional teams. This includes but is not limited to alignment between data domain owners.
- **Data Governance & Security:** Familiarity with central regulations (e.g. GDPR) and common data governance approaches.
- **Quality Focus:** You have a quality-first mindset and are highly motivated to develop tools and governance structures to improve our data quality and business continuity in the long run.
- **Data Analysis:** Highly motivated to understand data from different sources and domains, work on harmonization and common reporting strategies.
