

# Field Test Engineer - Truck Tire

## Ihre Aufgaben

### HOW YOU WILL MAKE AN IMPACT

#### SG 10

We are seeking a highly motivated and detail-oriented **Commercial Tire Field Test Engineer** to join our R&D team. In this role, you will be responsible for planning, executing, and analyzing tire wear benchmarking programs for commercial truck tires. You will work closely with cross-functional teams to evaluate competitor products, support product development, and provide data-driven insights to enhance tire wear & durability performance.

#### Key Responsibilities:

- Design and manage benchmarking programs to evaluate the wear performance of commercial truck tires in various applications across North America.
- Conduct field evaluations, including fleet testing and controlled wear tests, to gather real-world performance data.
- Analyze tire wear patterns, rates, and failure modes using statistical tools and physical inspections.
- Develop and maintain a comprehensive database of competitor tire performance metrics.
- Coordinate with Product Management, Technical Customer Service and Field Intelligence to prioritize target competitor products
- Close collaboration with central benchmark team including field surveillance of new competitor products, joint reports and local coordination of tire procurement
- Locate and develop testing relationships with a broad range of commercial fleet customers and salespeople
- Prepare detailed technical reports and presentations for internal stakeholders including R&D and the Business Area.
- Stay current with industry trends, new technologies, and competitor activities in the commercial tire market.
- Collaborate with product development teams to translate benchmarking insights into actionable design improvements.

## Ihr Profil

### WHAT YOU BRING TO THE ROLE

- Bachelor's in Mechanical Engineering, Automotive Engineering, Materials Science, or a related field.
- 2+ years of experience in tire engineering, tire testing, or a related field
- Experience with tire construction, wear mechanisms, and
