

IT Consultant – R&D Applications

Your tasks

You are seeking a new challenge at the interface of IT and R&D? This is your opportunity!

Join our dynamic Information Technology team as an IT Consultant in the R&D IT area. In this pivotal role, you will drive digital transformation, ensure operational excellence, and deliver impactful IT solutions.

Your key responsibilities are:

- Lead and support IT implementation projects (Agile, Waterfall, or Hybrid) within the R&D IT.
- Plan, execute, and deliver high-quality project outcomes on time and within budget.
- Identify, assess, and mitigate project risks and issues through proactive management.
- Lead project teams fostering teamwork
- Develop and execute stakeholder communication plans to ensure transparency and alignment.
- Ensure adherence to IT governance, standards, and compliance requirements.
- Be the IT partner of choice for our business customers by taking over technical consulting and ensuring best fit IT solutions.
- Oversee the operation, performance, and compliance of R&D applications, ensuring optimal availability and cost-efficiency.
- Coordinate with internal teams and external partners to manage application lifecycle and support.
- Build strong relationships with internal IT departments and key user groups to co-create strategic solutions.

Your profile

- University degree in computer science, Information Technology, Business Informatics, or a related field
- Several years of experience in project management, with a focus on managing IT projects and collaborating with external service providers
- Many years in IT application operations and project delivery
- Solid understanding of IT Service Management (ITSM) principles and tools
- Experience with R&D and Engineering applications
- Proven ability to lead and coordinate cross-functional teams, including business, IT, legal, and external service providers, to ensure project success
- Business fluent in English (written and spoken)
- Strong communication skills, enabling the management of stakeholder expectations, negotiation with vendors, and conflict resolution across diverse teams

About us

Continental develops pioneering technologies and services for sustainable and connected mobility of people and their goods. Founded in 1871, the technology company offers safe, efficient, intelligent and affordable solutions for vehicles, machines, traffic and transportation. In 2024, Continental generated sales of €39.7 billion and currently employs around 190,000 people in 55 countries and markets.

Guided by the vision of being the customer's first choice for material-driven solutions, the ContiTech group sector focuses on development competence and material expertise for products and systems made of rubber, plastics, metal, and fabrics. These can also be equipped with electronic components in order to optimize them functionally for individual services. ContiTech's industrial growth areas are primarily in the areas of energy, agriculture, construction, and surfaces. In addition, ContiTech serves the automotive and transportation industries as well as rail transport.
