

Machine Setter

Your tasks

Responsible for the maintenance and improvement of the tooling consistent with the plant objectives. Develop and maintain tooling where there is a maintenance plan for all tooling in the workshop where there is a systematic tracking. Must have strong organizational abilities, excellent planning, good technical understanding and strong interpersonal and communication skills.

Tooling maintenance key responsibilities:

Strategy: Develop and implement long- and short- term maintenance strategies, ensuring regulatory compliance, increased tooling reliability and availability for all shifts.

Projects: Lead maintenance projects, creates installation and commissioning strategies and ensures standardization of tooling.

Cost: Manage supplies and resources while driving cost-saving initiatives.

Reports: Ability to interpret TU reports and thus prepare, analyze data and track maintenance performance. Additionally, analyze and prepare tooling breakdown reports with corrective actions.

Maintenance: Ensure that there is a maintenance plan that is systematically developed and tracked. To perform predictive and preventative maintenance on production equipment and tooling. Identifying wear and tear patterns and root cause of tooling damage.

Legal Compliance/Regulations: Ensure compliance with OHS regulations, manage legal registers and oversee safety maintenance for critical equipment.
