Data Visualization Specialist

Responsabilități

This is a key role within the Americas BA team, responsible for transforming data into actionable insights through dashboards and analytical models. As a Data Visualization Analyst, you will develop and maintain Power BI solutions, enforce governance standards, partner with business users to resolve BI challenges, provide guidance, and support data-driven decision-making across multiple markets within our business area.

Responsibilities:

Development & Optimization

- Design, develop, and maintain dashboards and reports using Power BI, ensuring compliance with enterprise standards for governance and scalability.
- Collaborate with cross-functional teams to gather business requirements and translate them into data solutions, ensuring consistent KPI definitions.
- Validate data sources and ensure semantic models comply with security rules.
- Apply best practices for DAX, data modeling, and performance optimization.
- Document processes and enforce adherence to governance practices.

Support & Enablement

- Act as the main point of contact for business users, supporting reporting initiatives.
- Troubleshoot issues related to data sources, refresh schedules, and visualization.
- Provide training, guidelines, and documentation to improve data literacy and effective report usage.
- Foster active community engagement.

Innovation

- Stay up to date with the latest Power BI adopting new capabilities to enhance our analytics maturity.

Cerințe

Required

- Advanced English (Spanish is a plus).
- Bachelor's degree in Computer Science, Information Systems, Engineering, Business Administration, Data Science/Analytics or related field.
- 2+ years in BI or analytics roles.
- Experience in virtual project management within remote teams.

Persoană juridică
Continental do Brasil Produtos Automotivos Ltda.

- Experience integrating Power BI with SharePoint, Teams, or other collaboration tools.
- Proficiency in Power BI, including DAX, M Language for Power Query, and data modeling.
- Excellent problem-solving skills, analytical thinking, and attention to detail.
- Effective communication skills, with proven ability to influence stakeholders and work collaboratively in cross-functional teams.

Preferred

- Power BI Data Analyst Associate (PL-300) certification.
- Basics in SQL, Python, and/or KNIME Workflow Development.
- Experience with data warehousing, ETL processes, and cloud platforms (Azure preferred).
