

Senior Salesforce Developer / Dev Ops

Ihre Aufgaben

Continental's digital capabilities are growing every day. Our Data & Customer Solutions Information Technology team creates a wide range of technology solutions for Continental's Global Sales and Marketing teams - and we want you to join us!

Our team continuously works on the digitalization of our business-to-business processes and end consumer communication, using leading web technologies and a strong focus on data science and artificial intelligence. We run Continental's global customer relationship management platform, which supports our Sales colleagues in their daily interaction with customers.

If you'd love to join a global team that works on the latest technologies and creates value-added solutions for customers, Continental is the perfect match for you.

The **Salesforce DevOps Engineer** is responsible for building and operating reliable **CI/CD and release processes** for Salesforce. The role combines strong DevOps automation skills with Salesforce deployment expertise to deliver changes **safely, consistently, and with full traceability** across environments.

Key tasks:

- Drive the DevOps and release strategy for a global Salesforce Sales & Service implementation
- Design and maintain CI/CD pipelines (Azure DevOps/Git, SFDX/sf CLI, validation deploys, automated tests, quality gates)
- Define environment and branching strategy, release governance, approvals, and rollback/hotfix procedures
- Troubleshoot deployment issues (metadata dependencies, test failures, permissions) and continuously improve speed and stability
- Enforce DevOps standards (PR policies, coding/deployment best practices, secrets management, auditability)

Ihr Profil

- Academic degree in Computer Science or comparable qualification
- 5+ years of experience in **DevOps / Release Engineering**, ideally with **Salesforce delivery**
- Proven hands-on experience building and running **CI/CD pipelines** for Salesforce (e.g., **Azure DevOps/Git, SFDX/sf CLI**)
- Strong understanding of Salesforce deployment concepts (metadata, environments/sandboxes, Apex tests & coverage, dependencies, rollback/hotfix)
- Solid scripting/automation skills (e.g., **PowerShell, Bash, Python**) and
