

Marketing Technology Specialist

Vos activités

We are seeking a Marketing Technology Specialist to support in the integration, optimization, and operation of our core marketing systems, including our Digital Asset Management (DAM), Product Information Management (PIM), and Marketing Automation platforms. In this role, you will bridge technical and marketing functions by ensuring data flows seamlessly across systems, configuring tools to support marketing workflows, and troubleshooting platform issues. You will collaborate with marketing, B2B Sales applications, and IT teams to enhance content operations, improve digital experiences, and enable scalable, data-driven marketing execution. Ideal candidates combine strong technical aptitude with an understanding of modern marketing processes, system integrations, and digital content ecosystems.

Main Responsibilities:

- Evaluate business requirements and translate them into technical configurations;
- Oversee the implement and maintain integrations between DAM, PIM, and marketing automation platforms;
- Configure workflows, metadata schemas, taxonomies, and automation rules across systems;
- Ensure consistent data structures and content models across platforms;
- Collaborate with Marketing, Communications, Ecommerce and IT teams to support digital initiatives;
- Serve as the primary technical point of contact for DAM, PIM, and Marketing automation tools;
- Troubleshoot system issues, coordinate fixes with vendors or IT, and maintain documentation;
- Manage data governance and quality checks across systems;
- Develop and maintain technical documentation for Marketing Technology processes and workflows.

Votre profil

- Bachelor's degree in Computer Engineering or similar studies;
- Minimum 2 years of IT or Industry working experience;
- Hands-on experience with Pimcore or similar PIM platforms, including data modeling, API integration, and workflow configuration;
- Experience with DAM solutions, including asset lifecycle management and metadata standards;
- Proficiency in Marketing Automation tools is preferred, including campaign automation, segmentation, and personalization;
- Strong knowledge of API-driven integrations (REST, GraphQL);
- Familiarity with microservices architecture and event-driven systems;
- Experience with AWS and/or Azure for hosting, scalability, and security of SaaS solutions;
