

# Head of PI Material

หน้าที่ความรับผิดชอบในงานของคุณ

We are seeking a dynamic and experienced Head of Product Industrialization Material to join our team in Otrokovice 2, Czechia. In this pivotal leadership role, you will be responsible for overseeing the transition of product designs to mass production, with a strong focus on material selection, optimization, and industrialization processes.

- Lead and manage the product industrialization team, ensuring efficient execution of projects from concept to mass production
- Develop and implement strategies for material selection, optimization, and cost-effective manufacturing processes
- Collaborate with cross-functional teams including R&D, engineering, and supply chain to ensure seamless integration of materials into product designs
- Oversee quality control processes and implement continuous improvement initiatives
- Analyze and optimize material usage to enhance product performance and reduce costs
- Stay abreast of emerging materials and manufacturing technologies to drive innovation
- Ensure compliance with industry standards and regulations related to materials and manufacturing processes
- Develop and maintain relationships with key suppliers and partners in the materials industry
- Provide technical expertise and guidance to team members and other departments on material-related issues
- Create and present reports on project status, material performance, and industrialization metrics to senior management
