

Head of Plant Management

Your tasks

The mission of the position is to achieve plant goals in terms of quality, cost, assets and delivery based on approved budget, through the coordination of plant activities and optimization of plant efficiency in accordance with company guidelines. Furthermore, the Head of Plant Management is responsible for the management of plant staff as well as upholding the principles of safety, security, environmental protection and corporate social responsibility.

Strategy Development, Implementation and Change Management:

- derive the plant strategy from higher level strategic targets, in order to ensure the expectations of the customer and the profit of the company
- prepare the plant and its employees to meet requirements (internal and external)
- actively drive change processes and guide the plant and its employees through times of change

Entrepreneurial Responsibility, Finance/Controlling

- plan, optimize and control all activities in order to perform the following tasks
 - fulfill the market/customer requirements
 - improve plant cost structure (fix and variable)
 - agree on adjusted targets with the BU in case of major deviation to the budget (sales drop, product mix changes, etc.)
 - evaluate and define activities to achieve or improve the financial and operational business goals
 - review and authorize e-CR, e-PR and purchase orders (if applicable also for an operations unit)
 - evaluate and define actions to meet financial variations related to scrap, manufacturing and price
 - coordinate strategies to improve inventory changes and minimize inventory
 - ensure compliance with legal regulations (e.g. working hours, environment protection) and internal rules and procedures

Production and Supply Chain Management

- ensure high performance production processes with respect to KPIs (e.g. CT standard KPIs such as routing accuracy, process performance rate, delivery performance internal, manufacturing inventory valuations, overall equipment effectiveness)
- ensure high performance supply chain processes with respect to KPIs (e.g. CT standard KPIs such as delivery performance internal, manufacturing inventory valuations)
- ensure balancing between short-term customer requirements and unplanned occurrences within the operations unit in order to obtain the optimal load and achieve the maximum customer satisfaction (on-time deliveries)
