

# Product Development - Material Process Engineering

## Tus actividades

We are seeking a skilled Product Development - Rubber Material Process Engineer to join our innovative team in Granby, QC, Canada. In this role, you will be responsible for supporting hose activities by developing and optimizing rubber material processes for product development, ensuring high-quality outcomes and efficient manufacturing procedures.

- Lead the industrialization and optimization of rubber material processes for new and existing hoses products
- Analyze and improve manufacturing processes to enhance product quality and production efficiency
- Collaborate with cross-functional teams to integrate rubber material requirements into product designs
- Conduct experiments and tests to evaluate and industrialize rubber material properties and performance
- Develop and maintain process documentation, including standard operating procedures and technical reports
- Troubleshoot process-related issues and implement effective solutions
- Stay up-to-date with the latest advancements in rubber material technology and processing techniques
- Ensure compliance with safety regulations and environmental standards in rubber material processing
- Provide technical support and guidance to production teams and other stakeholders
