

CBS Coach - Lean Manufacturing Manager

Náplň práce

We are seeking a highly skilled and experienced CBS Coach - Lean Manufacturing Manager to join our team in Lodi Vecchio, Italy. In this role, you will lead and coach our manufacturing teams in implementing lean principles and driving continuous improvement initiatives across our operations.

- Develop and implement lean manufacturing strategies aligned with our Continental Business System (CBS) principles
- Coach and train cross-functional teams on lean methodologies and tools to improve efficiency and productivity
- Lead process improvement projects to reduce waste, optimize workflows, and enhance overall operational performance
- Analyze production data and key performance indicators to identify areas for improvement and develop action plans
- Facilitate kaizen events and other continuous improvement activities to drive cultural change and operational excellence
- Collaborate with department managers to implement best practices and standardize processes across the organization
- Develop and maintain performance metrics to track the success of lean initiatives and report on progress to senior leadership
- Foster a culture of continuous improvement and empower employees to contribute ideas for process enhancements
- Stay current with industry trends and emerging technologies in lean manufacturing to ensure the organization remains competitive

O nás

Continental develops pioneering technologies and services for the sustainable and connected mobility of people and their goods. Founded in 1871, the technology company provides safe, efficient, intelligent and affordable solutions for vehicles, machinery, traffic and transport. Continental generated sales of €39.4 billion in 2022 and currently employs around 200,000 people in 57 countries and markets.

The ContiTech Group Division develops and manufactures environmentally friendly, and intelligent products and systems for the automotive industry, railway technology, mining, agriculture, and other key industries, among other things. Guided by the vision of "smart and sustainable solutions beyond rubber", the division uses its many years of industry and materials knowledge to achieve a new level of efficiency by combining different materials with electronic components and individual components.
