

Mandatory Internship - Product Releases & Systems / Quality

RnD - REF93605R

Your tasks

The Tire Research and Development department at our location in **Hanover-Stöcken** is responsible for the quality of our development processes.

In this exciting environment, we offer a **mandatory internship** starting **mid April 2026**, with the option to follow up with a thesis project. For the best possible learning experience, the internship should be **6 months** long. A combination of voluntary and mandatory internships is feasible, with the mandatory part lasting at least 12 weeks.

Tasks include:

- Collaboration in the further development of quality-related trainings, including support in the implementation
- Participation in the improvement of the product development process of tires based on analyses of the existing data, e.g. on the development results and market performance
- Support in the development of meaningful quality indicators
- Collaboration in the further development of Continental knowledge management (Yokoten)

Your profile

- Students (m/f/diverse) in the field of mechanical engineering, industrial engineering, mechatronics or comparable study programs
- Specialization or strong focus in Data Science or Quality Management is preferred
- First experience with data visualization and analytics tools such as Tableau or Power BI
- Basic knowledge of database systems
- Confident handling of MS Office-applications
- Very good language skills in German and English, both written and spoken
- Collaborative mindset
- Strong communication skills
- Systematic and organized work style

Please attach your current certificate of enrollment and also your current transcripts of records and an extract of certificate for a mandatory internship. Those documents are mandatory for processing your application. If required, please submit your valid residence permit as well as your work permit including the additional sheet.

Applications from severely handicapped people are welcome.
