Our offer

What Can You Expect?

The eXplore Tire Manufacturing & Engineering Graduate Program covers a time frame of up to 18 months and is split into two main phases.

Phase 1 – Practical Experience

Quality comes from experience. To gain a broad knowledge of tire production, you will start the program with hands-on experience in a real production setting, where you will stay for 10–16 months. After that, you should be ready for the next big challenge: your first project at the plant.

Phase 2 – Central Placement

After this initial experience, you will be assigned to a pool of graduates in Hanover for 6–9 months, together with other manufacturing and engineering graduates from all over the world. By participating in a number of exciting projects, you will learn about the tire development process and our global Continental business model. This experience will broaden your knowledge and you will acquire new skills by attending a number of technical training programs. You will be given the opportunity to use your soft skills and build up a global network. In this way, you can forge long-lasting relationships with future colleagues from around the world. In addition to working on projects in the areas of manufacturing and engineering, you will have the unique opportunity to gain an insight into the research and development processes for tires. In addition, you will collaborate with other eXplore Tires graduates on a global business contract. During this time, you will present your project results to our top management.

THE PERKS
