Legal Entity
ContiTech Mexicana, S. de R.L. de C.V.

- **Languages:** English C1; German optional

Knowledge:

The position requires a knowledge of basic security, ITGC, ITAC, privacy, financial, and other regulatory related laws to perform the tasks.

These laws change and differ from continent, country, and functional area and the ability to research and interpret laws quickly is a must.

It is best if an audit background exists to quickly interpret and understand best practice guidance.

SOX or NIST background is a must.

Understanding of risk analysis and assessment is a must.

Additional Info:

Most of the time the job crosses multiple IT organizational levels, BU's within the division, and business functional areas.

It is important that good project management and organizational practices are maintained.

The job requires the need to adapt and come up with quick designs to implement.

Out of the box thinking is required. Ability to communicate with multiple management levels is required.

Experience with external audit teams is a big part of the job, so comfort with dealing with regulatory differences and how to overcome those is needed.

Our offer

At Continental we are committed to building an inclusive and discrimination-free ecosystem in Mexico, these principles are rooted in our corporate philosophy and culture. Therefore, it is totally forbidden to request a pregnancy or HIV test as part of our selection processes.

About us

Continental develops pioneering technologies and services for sustainable and connected mobility of people and their goods. Founded

in 1871, the technology company offers safe, efficient, intelligent and affordable solutions for vehicles, machines, traffic and transportation. In 2024, Continental generated sales of €39.7 billion and currently employs around 190,000 people in 55 countries and markets.

Guided by the vision of being the customer's first choice for material-driven solutions, the ContiTech group sector focuses on development competence and material expertise for products and systems made of rubber, plastics, metal, and fabrics. These can also be equipped with electronic components in order to optimize them functionally for individual services. ContiTech's industrial growth areas are primarily in the areas of energy, agriculture, construction, and surfaces. In addition, ContiTech serves the automotive and transportation industries as well as rail transport.
