

Senior Product Industrialization Engineer - Hydraulic Hose

Jūsų užduotys

The Senior Industrialization Engineer - is responsible for industrialization excellence across the IAM organization. This role ensures that new products, technologies, and engineering changes are industrialized and transferred into serial production in a scalable, robust, and cost effective manner across multiple manufacturing sites.

Serving as an SME to manufacturing plants, this position leads complex industrialization initiatives and ensures consistent launch readiness, process capability, and stable production performance. Leveraging deep expertise in hydraulic hose manufacturing processes and product-process interactions, the role drives problem solving, standardization, risk mitigation, continuous improvement, and alignment with global industrialization strategies.

The position is responsible for the industrialization of products across multiple hydraulic hose plants within IAM, directly influencing the successful execution, industrialization, and continuous improvement of products representing approximately €300 M in annual revenue.

Location: ContiTech Fairlawn OH, Open to locations in Norfolk, NE or Mount Pleasant IA.

HOW YOU WILL MAKE AN IMPACT

- Serve as Business Area technical authority for hydraulic hose manufacturing processes, ensuring consistent standards and capability across all sites.
- Lead end to end industrialization of new products from design definition through launch and stable serial production.
- Provide expert guidance on manufacturing technologies, materials, and assembly processes, including escalation and problem solving support.
- Define and optimize processes, equipment concepts, tooling, and layouts to meet safety, quality, cost, scalability, and capability targets.
- Drive DFM/DFA alignment with Product Development, Quality, Operations, and cross functional teams.
- Provide technical support for engineering changes to ensure controlled, disruption free implementation.
- Lead improvement initiatives focused on safety, quality, delivery, and cost.
- Support structured problem solving using Lean and Six Sigma tools (A3, 8D, DMAIC, SPC, MSA).
- Lead optimization initiatives addressing cycle time, yield, scrap, and cost.
- Deploy and govern manufacturing best practices and technical standards to ensure consistency and long term process robustness.

Juridinis asmuo
ContiTech USA, Inc.

- Support PPI Leadership with reviewing post launch manufacturing performance to ensure stable serial production and compliance with industrialization standards.
- Support PPI Leadership with monitoring of KPIs for quality, efficiency, capability, and cost to ensure sustained technical performance.
- Identify and assess industrialization risks and coordinate mitigation actions with plant teams.
- Analyze trends and deviations to prevent recurrence and drive proactive improvement.
- Support PPI Leadership with reporting of performance, risks, and improvement actions to PPI, Business Area leadership, and Management.
- Drive implementation and adherence to global product and process standards across locations.
- Define, maintain, and deploy technical guidelines and best practices in alignment with sector and plant teams.
- Serve as subject matter expert for hydraulic hose industrialization, providing training, coaching, and technical support to engineers and plant teams.
- Support introduction of new technologies, materials, and processes through proper validation, documentation, and standardization.

WHAT YOU BRING TO THE ROLE

- Bachelor's degree in Mechanical, Manufacturing, Chemical, or a related engineering or science fields
- 7+ years of extensive experience in Process and Manufacturing Engineering, with expertise in hydraulic hose manufacturing processes.
- Comprehensive knowledge and experience in rubber and plastic production processes and ramp-up projects.
- Product and process industrialization technologies, systems, standards, and infrastructure
- Industrial engineering fundamentals and methods
- Design and product manufacturing test processes
- Problem solving and decision making tools (A3, 8D, DMAIC, SPC, MSA, etc.)
- Project management tools, methods, and execution
- Product lifecycle processes
- Quality Core Tools (PFMEA, APQP, MSA, R&R, flowcharting, process control plans)
- Lean production / CBS principles, methods, and tools
- Proficiency in English is mandatory
- Travel approximately **70-80%** domestically and within the Americas region.

Legal authorization to work in the U.S. is required. We will not sponsor individuals for employment visas now or in the future for this job posting.

ADDITIONAL WAYS TO STAND OUT

- Leading Projects and specific teams (giving direction, feedback, motivation)
- Strong Communication skills
- Experienced working with international teams on production topics and understanding of foreign cultures
- Deep expertise in the processes (Mandrel Preparation, Extrusion, Braiding, Cover, Assembly, Curing, Blow out, Pressure Test and Crimping)
- Core hose manufacturing processes (mandrel preparation, extrusion, braiding, cover, curing, blow out, pressure testing, etc.)
