

# Service Owner and Software Developer

## Vos activités

Continental's Data & Customer Solutions Competence Center develops innovative digital products that support both our customers and internal teams, and we'd love for you to be part of it!

Our Digital Solutions IT team is searching for a talented Service Owner to oversee and enhance our Conti Connect Service.

As a **Service Owner**: you'll drive the strategy, operations, and support of the ContiConnect Service across its full lifecycle. You'll ensure stable delivery, collaborate with users and development teams, and uphold company standards for quality and security.

Additionally, in your **Developer role**, you'll contribute to feature implementation, technical improvements, and automation to continuously enhance service performance.

### Key responsibilities:

- Act as the accountable IT Service Owner, serving as the primary contact for all operational service activities across the organization;
- Oversee service delivery, improvement, and development in line with service agreements;
- Maintain and optimize the technical service setup ensuring compliance with internal governance frameworks, and IT risk management standards;
- Ensure full adherence to data protection, cybersecurity, and privacy policies across all service processes;
- Lead and coordinate ITIL-based service operations, managing incidents, problems, and change requests through the service desk with timely resolution and minimal business disruption;
- Collaborate with application owners, technical leads, developers, product managers, and key users;
- Provide regular reports on service performance, metrics, and overall service health to IT leadership and stakeholders;
- Act as the main escalation point for service related issues;
- Mentor and guide colleagues on best practices in IT service management;
- Identify and drive continuous service and process improvements;
- Support integration of automation and technical enhancements to improve service efficiency;
- Coordinate with development and release management teams to ensure seamless rollout of new features and changes.

## Votre profil

- University degree in Computer Science, Software Engineering, or other related field;
- + 3 years of professional experience in IT Service Management,
