

## Intern - Material Testing

### Tus tareas

#### Internship Opportunity - Material Testing Laboratory (Chemical Testing)

The Material Testing Laboratory is seeking an intern from a background in **Pure or Applied Chemistry, Polymer Science, or Materials Science** to support activities within the chemical testing function.

The intern will be involved in the following tasks:

- Conduct chemical testing on rubber and chemical raw materials
- Assist in test method development, including:
  - **Topic 1:** Improving the determination of percent devulcanization of reclaimed rubber
  - **Topic 2:** Conducting a feasibility study on alternative methods for evaluating percent devulcanization, aimed at enhancing the characterization of reclaimed rubber

This role offers hands-on experience in material testing within a chemical laboratory environment.

### Tu perfil

Undergraduate degree with a background in Chemistry or other sciences.

### Nuestra oferta

1. Strong command of the English language
2. Excellent analytical skills with strong attention to detail
3. Proficient in Microsoft Office tools (e.g., Excel, Word, PowerPoint)

Ready to drive with Continental? Take the first step and fill in the online application.
