# Technology Systems Key User - Requirements Engineering Tool - CTBC

## Tus actividades

As a team member of the Group Sector Central Function Technology of ContiTech, you are central Key User for Technology's IT systems and their interfaces, focussing on the Requirements Engineering Tool (RE-Tool). Your role and support will play an important active role in the execution of Technology's data management strategy. With this role you can set new standards in a completely new environment by driving the digital footprints for our material driven solutions and leaving your own. Your tasks will be:

- Manage and maintain CT Technology's RE-Tool & data
- Steer the RE-Tool related governance process to decided on requested changes and evaluate if those could bring value
- Follow up on detailed collection of business requirements and technical realization
- Manage the global application support & ticket handling
- Interface management ensuring (data-) exchange between all relevant applications
- manage the global key user community and any global application related communication
- Manage the stakeholder network on RE-Tool topics within ContiTech and provide support to further input like e.g. product development or sales
- Be first point of contact within global Technology Organization for all RE-Tool related topics
- Identify and frequently exchange with key stakeholders & (local) key users
- Manage the relationship to our external vendor in regards to RE-Tool topics/content
- Initiate / finalize projects according to the RE-Tool and CT Systems Landscape's roadmap
- Advice and consult the CT organization with RE-Tool related input in any relevant project
- Successful implementation, scope handling and roll out management
- Contribute to implementation & maintenance of requirement engineering process(es) and tool together with QM and BA teams with focus on Technology processes and products
- Create training content & provide trainings following the "train the trainner" concept
- Drive proper Change Management along RE-Tool implementations/updates

## Acerca de nosotros

Continental develops pioneering technologies and services for sustainable and connected mobility of people and their goods. Founded in 1871, the technology company offers safe, efficient, intelligent and affordable solutions for vehicles, machines, traffic and transportation. In 2022, Continental generated sales of €39.4 billion and currently employs around 200,000 people in 57 countries and markets.

Guided by the vision of being the customer's first choice for material-driven solutions, the ContiTech group sector focuses on development competence and material expertise for products and systems made of rubber, plastics, metal, and fabrics. These can also be equipped with electronic components in order to optimize them functionally for individual services. ContiTech's industrial growth areas are primarily in the areas of energy, agriculture, construction, and surfaces. In addition, ContiTech serves the automotive and transportation industries as well as rail transport.
