Salesforce DevOps Engineer

Feladatok

Continental's digital capabilities are growing every day. Our Data & Customer Solutions IT team creates a wide range of technology solutions for Continental's Global Sales and Marketing teams – and we want you to join us!

Our team continuously works on the digitalization of our business-to-business processes and end consumer communication, using leading web technologies and a strong focus on data science and artificial intelligence. We run Continental's global customer relationship management platform, which supports our Sales colleagues in their daily interaction with customers.

If you'd love to join a global team that works on the latest technologies and creates value-added solutions for customers, Continental is the perfect match for you.

The **Salesforce DevOps Engineer / Developer** is responsible for designing, building, deploying, and supporting scalable Salesforce solutions while ensuring reliable CI/CD, release governance, and deployment automation. The role combines hands-on Salesforce development expertise with strong DevOps and release management capabilities to deliver changes safely, consistently, and with full traceability across environments.

Key tasks:

- Drive the DevOps and release strategy for a global Salesforce Sales & Service implementation;
- Design, develop, and maintain Salesforce solutions across Sales Cloud and Service Cloud using Apex, Lightning Web Components, Flows, integrations, and declarative configuration;
- Design and maintain CI/CD pipelines (Azure DevOps/Git, SFDX/sf CLI, validation deploys, automated tests, quality gates);
- Define environment and branching strategy, release governance, approvals, and rollback/hotfix procedures;
- Support end-to-end delivery from technical design and development through testing, deployment, and production stabilization;
- Troubleshoot deployment and application issues, including metadata dependencies, test failures, integration errors, permissions, and environment inconsistencies;
- Collaborate with architects, admins, business analysts, and product teams to translate requirements into robust technical solutions.

Profilja

- Academic degree in Computer Science or a comparable qualification;
