

# FM Engineer

## Ihre Aufgaben

- Develop the annual building and facility maintenance plan, including proposals for major repair and refurbishment works.
- Supervise and coordinate planned and ad hoc building, facility, and infrastructure maintenance activities.
- Maintain and continuously update building, facility, utility, and energy-related documentation, drawings, records, and KPI data.
- Technically prepare and coordinate infrastructure and facility investment projects, from concept through implementation.
- Ensure local implementation, application, and compliance with corporate FM, energy, safety, and technical standards, as well as relevant legal requirements.
- Manage, structure, and update FM department documentation, ensuring transparency, traceability, and audit readiness.
- Ensure the operation, maintenance, and continuous improvement of the Energy Management System in accordance with ISO 50001 and corporate energy management rules.
- Monitor and support implementation of energy efficiency measures related to facilities and utilities in cooperation with relevant stakeholders.

## Ihr Profil

- University or college degree, preferably in mechanical, electrical, architectural or civil engineering, engineering management, or a related field
- Several years of experience in facility management, building maintenance, infrastructure, or energy management, preferably in an industrial or manufacturing environment.
- Practical knowledge of ISO 50001 Energy Management Systems is a strong advantage.
- Experience in technical project preparation and coordination is an advantage.
- Familiarity with corporate standards, compliance requirements, and documentation management systems.
- Experience collaborating with international teams and understanding foreign cultures
- English skills in written and spoken

## **Über uns**

Continental develops pioneering technologies and services for sustainable and connected mobility of people and their goods. Founded in 1871, the technology company offers safe, efficient, intelligent and affordable solutions for vehicles, machines, traffic and transportation. In 2022, Continental generated sales of €39.4 billion and currently employs around 200,000 people in 57 countries and markets.

Guided by the vision of being the customer's first choice for material-driven solutions, the ContiTech group sector focuses on development competence and material expertise for products and systems made of rubber, plastics, metal, and fabrics. These can also be equipped with electronic components in order to optimize them functionally for individual services. ContiTech's industrial growth areas are primarily in the areas of energy, agriculture, construction, and surfaces. In addition, ContiTech serves the automotive and transportation industries as well as rail transport.
