

Senior IT Engineer Network - CTBC

Your tasks

The Senior Network IT Engineer supports the development of secure, scalable, and resilient networks by designing and implementing enterprise connectivity and firewall architectures, leading complex projects, and providing expert-level support across global sites. This role collaborates with internal teams and external partners, contributes to architectural decisions, and drives continuous improvement aligned with modern IT practices including automation.

- Hold service ownership for one or multiple network services, supporting, maintaining and configuring connectivity and network infrastructure
- Manage and help implement Internet Access policies, firewall rules and service setup
- Schedules and performs installations, MAC (moves, adds and changes) and upgrades in accordance with established policies and procedures.
- Communication and collaboration with external suppliers, e.g., managed service providers, software and hardware vendors, as well as internal departments, business units and group sectors
- Creates on-site documentation for local IT to be able to better support devices at their locations.
- Monitor and control network performance in the areas of response, throughput and availability.
- Research specific products as necessary, participating in tool and vendor evaluations.
 - Drive incident resolution and problem management processes
 - Automate network tasks and contribute to process improvements
 - Lead and deliver complex network projects across global locations
 - Create and maintain technical documentation and network diagrams
- This position will be supporting our Plants/Offices globally. Travel to these plants may be required

Your profile

- Bachelor's degree in Computer Science, Information Systems, or related equivalent work experience
- Cisco Certified Network Professional (CCNP) or equivalent experience
- 5-7 years of network engineering experience with large enterprise network environments
- Strong knowledge of Internet Access firewall architecture, preferably Fortinet/Fortigates
- Experience with Fortinet and/or Cisco network systems
- Network automation experience (e.g., Ansible, Terraform)
- Basic knowledge in LAN/WLAN architectures, routing protocols, and network security firewalls
- Hands-on experience with planning, implementation, and administration of network systems
- Strong communication and collaboration skills across technical and
