

Senior IT Engineer Server & Cloud

Your tasks

The Senior IT Engineer Server & Cloud is responsible for delivering stable, secure, and efficient server, backup & recovery, virtualization layer and cloud infrastructure services within the ContiTech environment; supporting on prem and cloud workloads; ensuring compliance with internal standards; and contributing to modernization, cost optimization and transformation initiatives while collaborating with internal stakeholders and external partners.

- Provide advanced support for Windows and Linux servers (physical and virtual via VMware ESXi)
- Consult customers on the optimal hardware setup and execute or coordinate implementation taking into account strategic, financial and customer targets
- Main contact person for one or multiple services below: Windows Server, Linux Server, Oracle & SQL Databases, Storage Platforms, Backup & Recovery, AWS & Azure Cloud, Kubernetes Containers, terminal server, Virtualization Layer, on-prem Data Center
- Contribute to secure cloud architectures, consolidation, standardization and harmonization of platforms
- Automate security controls and configuration management
- Develop and maintain runbooks and automated workflows (PowerShell, Bash, Python, Terraform)
- Perform critical installations or upgrades in collaboration with L2/L3 service partners
- Occasional work on incident, problem, and change management processes according to defined SLAs and compliance requirements.
- Contribute to cloud migration, automation and modernization projects
- Evaluate technologies and market trends for service in closer scope
- Support projects, TCO assessments and carve out/M&A scenarios
- Maintain technical documentation, monitor performance and capacity
- Support global plants/offices (occasional travel, occasional on-call for emergencies shared between team members/timezones)
- Coordinate closely with internal customers (plants, competence centers, business units) to execute their requirements in collaboration with Infrastructure, Engineering and Applications teams

Your profile

- Bachelor's degree in Computer Science, Information Systems, or Related equivalent work experience.
- Excellent english skills applied in business context
- Certification is a plus: VMware Certified Professional (VCP) , Microsoft Certified Solutions Expert (MCSE), Azure/AWS Solutions Architect Expert, or equivalent experience
- At least 3 years in enterprise IT infrastructure, compute platforms, or cloud operations.
