

Senior IT Engineer Network - CTBC

Your tasks

The Senior IT Engineer Network supports the development of secure, scalable, and resilient communication infrastructures by designing and implementing enterprise LAN/WLAN networks and advanced Voice solutions. This role leads complex projects, ensures stable global Voice operations, and provides expert-level support across multiple sites. Collaboration with internal teams and external partners is essential, as is contributing to architectural decisions and continuous improvement—including automation.

- Support, maintain, manage, implement and configure global communications and Voice infrastructure (VoIP, SIP trunks, Cisco Voice, Webex Calling, Teams telephony).
- Manage corporate mobile contracts and carrier escalations.
- Implement and support LAN/WLAN architectures including Cisco wireless standards.
- Execute installations, moves, adds, changes, and upgrades according to policies.
- Ensure high Voice quality by applying network best practices including QoS, VLANs, routing, and redundancy protocols.
- Monitor and control network and Voice performance for availability, throughput, and call quality.
- Collaborate with external providers, managed services, hardware/software vendors, and internal teams.
- Create documentation and diagrams to support global and local IT teams.
- Drive incident resolution and problem management for network and Voice systems.
- Contribute to automation efforts and continuous improvement initiatives.
- Lead and deliver Voice and network projects across global sites.
- Conduct product research and participate in vendor/tool evaluations.
- Provide support for global plants/offices; travel as needed.
