

IT Engineer Network & Firewalls - CTBC

Your tasks

To support and enable our continuous development of secure and state of the art infrastructure services, we are looking for an IT Engineer Network & Firewalls interested in introducing, operating and further developing the firewall and proxy infrastructure for our globally used Access services portfolio. The IT Engineer Network & Firewalls follows the main principles and design patterns of any modern, scalable, flexible and resilient infrastructure and is a central contact for internal customers and external partners. You will work in a dynamic, collaborative environment with a highly qualified team.

Your tasks and responsibilities:

- Consulting, designing, and piloting network architectures and deployment of next-generation firewall and proxy services according to basic architecture best practices
- Communication and collaboration with external suppliers, e.g., managed service providers, software and hardware vendors, as well as internal departments
- Continuously improving functionalities and operations, fostering standardization, harmonization, network stability and reliability, security and cost efficiency
- Driving escalation and problem management processes, coordinating complex incident and problem resolution with internal IT teams and external service providers
- Delivering complex projects on time and possesses a strong background in networking technologies
- Leveraging tools to automate networking and firewall tasks
- Assisting customers with process improvements, documentation, training and usability efforts
- Architecting release processes, workflow and live deployments in complex production IT environments
- Performing feasibility studies and IT concepts, market research and vendor evaluations

Your profile

- Academic degree in Computer Science, Information Technology or equivalent experience
- Knowledge in the networking area: network topologies, IP protocols and concepts (TCP/IP, IPSec, SSL, VPN, DNS), dynamic routing protocols (OSPF, BGP)
- Knowledge in ITSM processes and DevOps (automation, infrastructure/configuration as code) is a plus
- Experience in automation for on-premise and virtual environments (e.g., Ansible, Terraform)
- Experience in steering external service providers and partners
- Ability to solve complex network problems/issues using appropriate
