

IT Engineer Client Environment & Mobile Devices

Ihre Aufgaben

We are seeking a skilled IT Engineer Client Environment & Mobile Devices to support, operate, and further develop our Client Environment and Mobile Device services. This role is central to ensuring a reliable, secure, and efficient client landscape across mobile platforms, traditional clients, and virtual workspaces.

- Operate and further develop the Mobile Device Management (MDM) platform with a strong focus on Apple, iOS, and JAMF.
- Define and maintain configuration profiles, security baselines, compliance controls, and enrollment processes for mobile devices.
- Ensure secure, stable, and user-friendly lifecycle management of mobile devices
- Collaborate with external partners and vendors to enhance MDM functionality and optimize related processes.
- Oversee system management platforms (e.g., Landesk) to support patching, software distribution, and update lifecycle activities.
- Operate and further develop the Intune endpoint management platform for all mobile devices incl. hand held scanners on the shopfloor
- Contribute to modernization, harmonization, and automation initiatives within system management.
- Ensure system and patch management processes comply with security and corporate standards.
- Manage packaging, testing, and deployment of software across heterogeneous client environments.
- Work closely with external partners to ensure efficient software packaging and high-quality releases.
- Maintain documentation of packaging standards and continuously improve packaging workflows.
- Support and optimize macOS, Windows, and VDI client environments.
- Participate in architecture reviews and propose improvements across client technologies.
- Coordinate with external service providers for L2/L3 operations and ensure alignment with internal service expectations.
- Monitor and improve service performance, reliability, and overall user experience.
- Act as an architectural point of contact for client and mobile services within the team.
- Ensure service designs align with security, compliance, and operational guidelines.
- Support long-term roadmap planning and harmonization across client and mobile services.
