

Group Leader Process - Tires

Descrição da função

We are seeking an experienced and results-oriented **Group Leader Process** to lead a team of engineers in driving process optimization, operational excellence, and continuous improvement initiatives. This role is instrumental in enhancing manufacturing performance, supporting business objectives, and fostering a culture of innovation, quality and collaboration.

Key Responsibilities:

- Develop, implement, and optimize manufacturing processes to ensure stable and efficient production;
- Identify process bottlenecks and lead problem-solving activities using structured methodologies;
- Support new product launches and industrialization projects, ensuring smooth implementation into production;
- Monitor and analyze key performance indicators (KPIs) and implement corrective actions where needed;
- Lead root cause analysis activities and drive sustainable corrective and preventive actions;
- Manage engineering resources, priorities, and project timelines to meet business needs;
- Leads internal strategic projects and fulfill the tasks defined within them;
- Provides mentoring and onboarding training for new team members in Process Engineering;
- Actively participate in problem-solving activities and corrective actions.

Requisitos

- Technical University Degree in Engineering;
- Minimum 5 years experience in Process Engineering in manufacturing industry;
- Previous leadership experience - minimum 3 years;
- Advanced Quality Core Competencies: Structured Problem Solving, internal Audit, KPI Management;
- Advanced knowledge related to Automotive Core Tools;
- Advanced English level;
- Advanced Microsoft Office;
- Solid understanding of stakeholders and industry trends;
- Project management track record;
- Experience in managing budgets and costs;
- Experience in successfully managing a change process;
- Ability to work effectively within a matrix organization;
- Knowledge of rubber manufacturing represents a plus.
