

Senior Utility Engineer (facilities)

工作职责

The Senior Utility Engineer is the technical lead for the design, engineering, and optimization of industrial utility systems in Mexico and the America region. This role drives complex engineering deliverables, leads design reviews, guides junior engineers, and provides expert technical consultation across projects and operations. The Senior Engineer ensures systems are engineered for reliability, maintainability, safety, and compliance with Mexican and international standards.

Key Responsibilities

- Lead conceptual, basic, and detailed engineering for complex utility systems including steam/condensate, boilers, chilled water, cooling water, HVAC utilities, compressed air, water treatment, wastewater, fuel gas, nitrogen, and fire protection.
- Develop and approve engineering deliverables: P&IDs, 3D model reviews, line lists, utility load summaries, risk assessments, and equipment sizing calculations.
- Conduct advanced engineering studies: system capacity modeling, redundancy strategies, energy balance optimization, and risk-based design evaluations.
- Define technical criteria for complex modifications, expansions, or greenfield utility systems.
- Act as technical authority during design reviews, vendor meetings, and construction support.
- Mentor junior engineers and review contractor engineering packages.
- Author and approve technical specifications and performance requirements.
- Lead technical bid evaluations, vendor audits, FAT/SAT, and commissioning activities.
- Ensure compliance with NOM, ASME, NFPA, API, ISA, and corporate standards.

职位要求

- Bachelor's degree in Mechanical, Chemical, Industrial, or related Engineering.
- Several years experience in utility engineering and industrial facility design.

关于我们

Continental develops pioneering technologies and services for sustainable and connected mobility of people and their goods. Founded in 1871, the technology company offers safe, efficient, intelligent, and affordable solutions for vehicles, machines, traffic and transportation. In 2023, Continental generated sales of €41.4 billion and currently employs around 200,000 people in 56 countries and markets.

Guided by the vision of being the customer's first choice for material-driven solutions, the ContiTech group sector focuses on development competence and material expertise for products and systems made of rubber, plastics, metal, and fabrics. These can also be equipped with electronic components in order to optimize them functionally for individual services. ContiTech's industrial growth areas are primarily in the areas of energy, agriculture, construction, and surfaces. In addition, ContiTech serves the automotive and transportation industries as well as rail transport.
